

HideProgressBar

Description

The **HideProgressBar** method hides any previously shown popup progress window which was shown using the [app.ShowProgressBar\(\)](#) method.

```
app.HideProgressBar();
```

See also: [ShowProgressBar](#), [UpdateProgressBar](#)

Example

```
function OnStart()  
{  
    app.ShowProgressBar( "Processing...", 0 );  
    setTimeout( "app.UpdateProgressBar(25)", 1000 );  
    setTimeout( "app.UpdateProgressBar(50)", 2000 );  
    setTimeout( "app.UpdateProgressBar(75)", 3000 );  
    setTimeout( "app.UpdateProgressBar(100)", 4000 );  
    setTimeout( "app.HideProgressBar()", 4100 );  
}
```
