

WriteFile

(Information and examples taken from the DroidScript documentation)

Description

The **WriteFile** method writes a text file to internal or external file storage.

Use the option **"Append"** to append text to the file and the option **"Ascii"** can be used to write plain ascii files if required (the default is Unicode).

```
app.WriteFile( fileName, text, mode, encoding );
```

See also [ReadFile](#)

Example

```
function OnStart()  
{  
    app.WriteFile( "/sdcard/wftest.txt", "Hello", "Append" );  
}
```
