

How to navigate in a WebView?

```
//Called when the back key is pressed.  
function OnBack()  
{  
    if(web.CanGoBack())  
    {  
        web.Back();  
    }else  
    {  
        app.Alert("Can't go back");  
    }  
}
```
